

## AVONSIDE and VELUX the professional partnership for supply and fit – helping you to meet building regulation requirements.

Avonside Roofing is very proud of its hard earned reputation for quality. It has won numerous awards over the years from a wide variety of customers. Many of these awards are regional and reflect the high standards achieved and maintained by all the branches of Avonside Roofing across Britain.

The Avonside workforce enjoys an ongoing programme of training so as to be familiar with appropriate methodologies and materials. This ranges from ensuring that the site is kept tidy and free from hazards to monitoring and inspection of finishes on roofs to completion of all necessary documentation.

Innovation has always been a central philosophy and dynamic at Avonside Roofing, keeping the company at the cutting edge of the industry.

The Company's track record enables it to fully understand the challenges facing the house builder in the current market. It has developed an enviable host of policies and procedures to manage customer requirements, backed up by vision and a financially astute management team.

Avonside Roofing continues to offer its customer base of house builders, local authorities and construction companies an expanding array of roofing solutions that continuously evolves as the business and its environment evolves.

The diverse nature of these types of project will often utilise the full range of Avonside's skills base by integrating specialist services available within the Group to offer a **single source solution** for the roofing element of any contract. If you have specified VELUX products, whether it's windows, tunnels or solar for your project why not let Avonside 'supply and fit' them as part of your roofing contract.

There are strict building regulation requirements for energy efficiency concerning the interface of a roof window and the roof structure. This puts a responsibility on you as a house builder to make sure the roof window is insulated properly to prevent heat loss, and to provide proof of compliance on the request of building inspectors. Avonside can take care of all that for you.

As market leader, in the UK roofing industry, Avonside Roofing has identified a requirement to provide solutions for improving the energy efficiency of Britain's properties. We are therefore committed to meet the challenges faced by both the refurbishment and new build sectors of the industry.

# A professional and forward thinking company

## Avonside Roofing supply and fit VELUX products

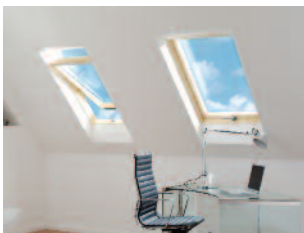

Avonside are a specialist 'supply and fit' contractor that covers the whole of the UK.

We can 'supply and fit' a diverse range of VELUX Roof Windows and panelised roofing systems for 'room in roof' housetypes and can take the building from 2nd floor joist level or wallplate, all the way through to tile complete, offering huge savings on build duration whilst removing several Health and Safety risks associated with traditional methods of construction.

### Roof windows for all budgets

Avonside want all of our partners to continue using the highest quality certified products such as VELUX, but there are instances where price is the main driver. In response to this requirement we have a suitable cost saving solution from RoofLITE.

RoofLITE products are designed for people looking for excellent quality at a lower price. By offering a smaller range and other cost drivers, RoofLITE achieves its goal: a great product at the best possible price.

RoofLITE pine windows are a basic cost driven centre-pivot pine roof window solution.

#### What RoofLITE offer

- CE certified
- Service provided by merchant network
- Most competitively priced roof windows
- ISO 9001 certified
- Concise range
- Complies with all necessary building regulations
